PATIENT CONSENT FORM

Date

We are conducting a study in an effort to learn more about the influence of certain enzyme functions in causing disease. We would like your participation in this study. To do so requires completing a questionnaire regarding your residential and occupational history, and tobacco usage. In addition, it involves withdrawing a small blood sample from your arm by hypodermic needle. Your arm may be sore for a short period of time. Any questions you may have will be answered as completely as possible.

By signing below, I consent to participate in the study. I understand that this is an effort to increase man's knowledge of diseases, and that any information obtained from me will be kept strictly confidential. I realize that I have the right to deny or withdraw my consent to participate at any time.
